Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-tc3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

...Abstract: to compute probability density functions for continuous
random variables. We make this extension by approximating **prior** and
conditional densities using sums of **weighted** Gaussian distributions and
then finding the propagation rules for updating the densities in terms of
these **weights**. We present a simple example that illustrates the Bayesian
network for continuous variables; this example...

Abstract (Basic):

... omitted from the list of offered products since the selection
offered to the customer puts **more weight** on the customer's personal

interest, **earlier** orders and **earlier** searches thereby reducing the **number** of **presented** **products** down to a **more** comprehensible **level** . Since the periods during which the services are available, are also taken into account in...

...reduced weighting of services offered on a more permanent basis. Thus, the vivacity of the **product** slate and highlight new **products** and services can be improved...

Abstract (Basic):

... to rank object in order of predicted similarity to target object. If the object is **most** similar to target object is not ranked first. The **object ranking weight** or **number** is adjusted, based on **objects ranked higher** than that **most** similar to target, **number** of changes in direction, either positive or negative and **current** and **prior** adjustments to **weight** or **number** .

... A PROXY CACHE

TECHNICAL FIELD

Embodiments of the present invention relate to content delivery
networks. **More** specifically, embodiments of the **present** invention
relate to caching proxies.

BACKGROUND ART

Before the widespread use of caching in the Internet, an item of content (a content object) requested by a client was likely provided by the original...

...distance from each other, which often led to slow response times, low bandwidths, high loss rates, and lack of scalability. Response times, bandwidths, and loss rates could also be significantly affected when multiple clients attempted to request an object from the...

...may be collected by delaying the segmentation process. Thus, by initially caching the entire content object, and waiting for actual client usage prior to segmenting the object, a more realistic segmentation size may be utilized. Furthermore, segment admission and eviction policies may be adapted in real time based on these...

...Abstract: an improved collaborative recommendation method based on multi-level similarity computation. Recommendation systems that suggest **products** to customers are gaining **popularity** in the field of electronic commerce. The collaborative recommendation system computes similarities between users by using **previous** ratings on various **items**, and recommends the **items** **rated high** by similar users. One significant limitation of collaborative recommendation, however, is that the sparseness of data highly restricts the range of recommendable **items**. To overcome the data sparseness we used a multi-level category of **items** in computing user similarity. By using multi-level similarity computation with cardinality and variance weighting...

"The shredder market is estimated at between \$70 million and \$75 million **today**. During the **past** decade, shredder **sales** consistently have had an average **growth rate** of five to ten percent,' explains Sandy M. Alaynick, national sales manager at General Binding...

...evaluate their need for increased security, says Fellowes Manufacturing's (Itasca, IL) William P. Reddy, **product** manager, "An additional stimulus to demand may be the availability of lower-cost shredders, which...

...feasible for smaller businesses.' Reddy suggests that personal, desk-side machines may have become more **popular** as a result of the media coverage of shredding.

"Our shredder sales have increased 100...

...sales two years ahead of our original projection,' he says.

But others simply attribute the **popularity** of these machines to their inherent worth as security tools. "The factor that has affected...

(1) Telephone sets Telephone production totaled 14.94 million **units** ,
up 14.2% over the previous year, and was worth 217.8 billion yen, an...

...value over the rise in production volume reflects a number of factors.
These include the **popularity** of cordless phones, the advance of higher
value-added instruments with built-in answering machine...

...market was liberalized in April 1985, there has been an incredibly rapid
turnover in telephone . **products** . Demand has shifted sharply from
standard telephone sets to multifunction **units** and then to cordless
phones. When cordless phones first appeared, the weak radiowave type was
the dominant **product** , but the low-power type has become the mainstream
model at present. Cordless telephone production continued to show
phenomenal growth in FY'89. Some 4.73 million **units** were produced (up
56.7% over the previous year), having a value of 88.9...

...domestic market accounted for nearly half (490/o) of the total. About
56% of all **units** produced for sale in Japan were of the low-power type.
At the end of...
